

# Bio-Chel™ Fe

## Granular

10% Fe w/w

Bio-Chel Fe Granular is a completely water soluble micronutrient, organically chelated and optimised to ensure stability and availability across a wide range of pH's between 3.0-7.0. Ideal for use in mixing with dry powders or for use in all irrigation systems.

### Crops

For use on all agricultural crops including cereals, vegetables, fruit crops, vines, citrus crops and ornamentals.

### Recommendations

- ▶ For fertigation apply 7.0-10.0kg per Ha per growing season.
- ▶ For foliar application use at 1.0-2.0kg per Ha depending upon crop.
- ▶ For more detailed application rates please contact Engage Agro.

### Precautions

**Risks: R22** Harmful if swallowed.

#### Safety advice:

**S2** Keep out of reach of children.

**S24/25** Avoid contact with skin and eyes.

**S46** If swallowed seek medical advice immediately and show this container or label.
